WHY THIS WORKSHOP IS IMPORTANT

Today's schools are increasingly multicultural and multilingual with students from diverse social and economic backgrounds. Educators and community agencies serve students with different motivation for engaging in learning, behaving positively, and performing academically. Social and emotional learning (SEL) provides a foundation for safe and positive learning, and enhances students' ability to succeed in school, careers, and life.

Research shows that SEL not only improves achievement by an average of 11 percentile points, but it also increases prosocial behaviors (such as kindness, sharing, and empathy), improves student attitudes toward school, and reduces depression and stress among students. Effective social and emotional learning programming involves coordinated classroom, schoolwide, family, and community practices that help students develop the following skills: self-awareness, self-management, social awareness, relationship skills and responsible decision-making.

This two-day workshop offers participants an engaging and interactive approach to incorporating social-emotional learning and mental well-being into the lives of children and youth as well as into their own lives as adults and educators.

AGENDA HIGHLIGHTS
